

# Epson EB-W16

## DATASHEET

The Epson EB-W16<sup>1</sup> is Epson's first active 3LCD 3D projector designed to support corporate and higher education users. This portable 3D projector delivers equally high White and Colour Light Output of 3,000 lumens, while Epson's 3LCD technology faithfully reproduces image colour for bright, vivid images.

The Epson EB-W16 delivers visibly brighter colour content than an equivalent single chip DLP projector, thanks to Epson's 3LCD technology. Combined with superb colour reproduction, the Epson EB-W16 delivers bright, easy-on-the-eye, high-quality 3D images, while a 5,000:1 contrast ratio provides superb detail for outstanding quality.

With a pair of lightweight, rechargeable Radio Frequency (RF) active shutter 3D glasses<sup>2</sup>, users can view their content without interference. These industry-standard glasses mean users can keep them for future upgrades, as well as using them with compatible 3D projector and flat panel displays from other manufacturers.

Supporting all HDMI compatible 3D signal formats, the Epson EB-W16 displays side-by-side, top-and-bottom, and frame packed content, providing users with the ability to project the widest range of 3D content available.

Quick to set up, the Epson EB-W16 offers automatic horizontal and vertical keystone correction as well as a screen fit function which automatically resizes the projected image to perfectly fit a framed projection screen. In addition, the slim, lightweight, portable design of the EB-W16, combined with x1.2 zoom, enables users to display 3D content almost anywhere.
