

Epson WorkForce Pro WP-4000 Series

DATASHEET

With laser-like looks and performance, combined with reliability and significantly lower running costs, the Epson's WorkForce Pro WP-4000 Series is engineered for business. Businesses can now have it all: less cost and more speed.

These high-speed inkjet printers offer demanding businesses a genuine alternative to laser that can save up to 50% on the cost of colour printing². The series offers further savings with a super-fast automatic double-sided printing function, reducing paper usage and costs by up to 50%. Businesses can also benefit from lower ink costs thanks to a choice of high-yield cartridges. ENERGY STAR-qualified reduced power consumption brings additional cost and energy savings.

Sharp, business-quality documents featuring both text and graphics are delivered at fast print speeds of 16 mono pages per minute and 11 colour pages per minute³, and the print resolution of 4800x1200dpi is much higher than comparative lasers.

There are three models in the WP-4000 Series. Including the standard WP-4015 DN version, all versions come network-ready with USB and Ethernet connectivity, while the WP-4025 DW¹ has added Wi-Fi capability for secure wireless printing. For easy integration into complex IT environments, the WP-4095 DN⁶ model has PDL support, including PCL6, PCL5c and Adobe® PostScript® 3™.

All versions have a compact and professional laser-like design to maximise workspace and complement the business environment.
